

SERVICE MODULES

Access Control and Site Safety

CONNECTING A COMPETENT WORKFORCE

Pegasus[™]
an Avetta Company

Site and Project Safety in the Pegasus solution empowers you to manage worker safety and compliance, site access, hours worked, emergency evacuations, and fatigue in real time.

This service works alongside Pegasus Access Control – where compliant workers are given access to your sites and projects via logpoints, kiosks, boom gates, turnstiles, and mobile apps.

Pegasus[™]
an Avetta Company

*Only competent workers
and valid cardholders
can access your sites
and projects.*

ACCESS CONTROL

Each worker, visitor and contractor logs in and out at an access point at the beginning and end of their time on your site.

With each Pegasus access ID card connected to the worker's profile in your workforce management solution, you have **full visibility and insight** into **who** they are, **the work** they're doing, and **the hours** they are on site.

- validate all worker information in real time
- verify access based on company pre-qualification and worker competencies
- manage fatigue levels and report on work hours
- get alerts on expiring inductions
- test for drugs and alcohol
- reconcile time sheets and invoices
- schedule reports
- create emergency evacuation events
- make informed staffing decisions

SITE SAFETY

The outcome of all Pegasus service modules, Site Safety is the **holistic management** of the safety of your workforce.

Companies must meet your safety standards, pre-qualifying with valid licences, insurances and safety systems.

Workers must prove their competence to your set roles with valid licences, tickets, training and inductions.

Only when **each company and worker has reached compliance** will they be given access to your site, where you will:

- manage their access with logpoints, kiosks, boom gates, turnstiles, and mobile solutions, and
- report on their competence at any time with business intelligence solutions.

The Site Safety capabilities Pegasus provides tell you **everything you need to know to manage your workforce**, from the validity of a worker's induction, to their fatigue level and the expiry date of their licences. The Pegasus solution sends electronic reminders about expiring documents to keep your workforce safe and competent.

Pegasus creates

WORKFORCE MANAGEMENT SOFTWARE

that **supports the safety** of your sites & projects
