

# Capability Statement

Pegasus connects networks of **safe workers, companies, and assets.**

We help our clients manage risk, increase productivity, and ensure the safety of their workforce – including contracting companies, workers and assets – in our cloud-based platform.

With over 3 million workers already verified in the Pegasus network, our software will transform the way you work, delivering a safe, compliant, and productive workforce.

*“Pegasus is used in managing safety, job planning and reviewing the commercial side of things. Pegasus is now integrated with everything we do.”*

**Grant Crosley, Visy**
